Defined Website Category - “Google Searches Today”

Google is the largest internet search organization in the world. For their part the following statements are absolute fact:

- Total Google searches conducted on February 16, 2016 at 23:59:59 EST was 4.579 billion.
- OIL FREE LLC’S total Google search results for the 5 days of February 12th – 16th, 2016 averaged out to be at least a minimum of 20% of the globally acknowledged Google searches in any 24 hour period. [reports attached]

Additional categories [support documents] can be found on Google Searches Today.

February 17, 2016

It should be noted that, since Friday February 12, 2016, a surge in the searches on the twenty Google pages identified below has reached a phenomena, with February 12th - 16th demonstrating a Google Trend acknowledging the following statistical Google searches:

Friday - February 12th: Sum Total - 1,024,257,000
Saturday - February 13th: Sum Total - 1,017,866,000
Sunday - February 14th: Sum Total - 1,014,246,000
Monday - February 15th: Sum Total - 1,013,757,000
Tuesday - February 16th: Sum Total - 1,003,956,000

The collection of data from Google for the past five (5) days is an irrefutable Google Certification that there is a minimum of 700 million interested requests on a daily basis outside the United States for additional information about the real possibility of a new U.S. Grid.

It should be noted that, to date, we have never received one formal complaint against our library of documents as seen on our webpage, www.oilfreellc.com

I have just finished reading "Lights Out" by Ted Koppel, a book published by Crown Publishers, a division of Penguin Random House LLC. This is an accurate depiction of threats to the power grid that could be carried out by Rogue States or Groups around the world. Oil Free LLC's Two (2) Wallace HOD Systems, if properly deployed, could provide enhanced protection of the electrical system from such terrorist threats.
