Re: **ARMAGEDDON**

Subject: **LIGHTS OUT** authored by Ted Koppel  
Published by Crown Publishing Group a Division of Random House

Dear Mr. Vice President:

I have personally have made a decision to send you this document via social media as I previously have discussed with your son the late Beau Biden just weeks before he left us much too early. At this time I would like to apologize to you, his family and all concerned but it was clearly outlined between the two (2) of us that I would publically make available the milestones as described in the 24 Page Document dated February 17, 2015 that centered on building a new U.S. Grid without using any taxpayer dollars, he was very proud of this document and its achievement. Complete details are clearly laid out in numbers one (No.1.) through six (No. 6.) below that will be noted around the World for many years to come. I believe this will be a tribute to Beau.

No.1. LIGHTS OUT authored by Ted Koppel  
Published by Crown Publishing Group a division of Random House

This is an efficient recording of what Armageddon could be like in the United States at any time. This would occur by our enemies which we will not be able to identify. There is no immediate cure to the loss of power or any plan to help the victims currently

February 26, 2016

available as told to Ted Koppel by Homeland Security Secretary, Jeh Johnson, and the Secretary of Energy, Ernest Moniz. This has been confirmed by the former Director of the National Security Administration Keith Alexander.

#### No. 2. Google Trending

Currently Leonard D. Wallace and Oil Free LLC have a following of about a billion results daily looking for information. Declaratory statements I have just made can be easily authenticated by visiting our website Home Page at [www.oilfreellc.com](http://www.oilfreellc.com) and selecting the Menu Key DAILY GOOGLE TRENDING. It should be noted that since June 11, 2015 not only Leonard D. Wallace and Oil Free LLC but none of the [20] sites monitored have had a single registered complaint made to Google.

#### No. 3. 24 Page Document

Early 2015, prior to February 17, 2015, Oil Free LLC's research team led by A. Michael Ruggiero who is the Director of Manufacturing for Oil Free LLC and a Laurel, Delaware resident researched the information to print this document. The 24 page document this printing was submitted to Josh Alcorn and the late Beau Biden. Beau confirmed that he had accepted the information and sent this to his father without any objection to its contents. Beau was extremely pleased that the State of Delaware could become the FIRST STATE that would be a part of the new U.S. Grid which would be hailed as the beginning of a the NEW INDUSTRIAL REVOLUTION and definitely an AMERICAN EXCEPTIONALISM. He confirmed that this would help him become the next Governor of the State of Delaware and almost guarantee his father would become the next President of the United States. Please keep in mind that the new grid would eliminate all overhead wires, eliminate carbon production by fossil fuels and eliminate greenhouse gases. Hydrogen derived from the abundance of clean sea water processed by the Wallace HOD Systems in conjunction with the Caterpillar, CAT G20CM34 10MW natural gas-fired reciprocating generator set, as used currently by Mid-Kansas Electric at the Rubart Station facility near Ulysses, Kansas. This information can be viewed in a 3 page letter to Caterpillar dated January 16, 2015, pages 14-16 of the 24 page document which is available on our website [www.oilfreellc.com](http://www.oilfreellc.com) It should be noted and has already been acknowledged that established and proven information technology to encrypt the operation of the equipment described above is considered to be on the shelf technology.

#### No. 4. Direct and Indirect Employment

Specific details can be found on our website [www.oilfreellc.com](http://www.oilfreellc.com) by selecting the Menu Key titled JOBS, JOBS, and more JOBS

February 26, 2016

In summarizing, Direct Employment of 640,000 skilled jobs will be created, where the average hourly wage is anticipated to be \$50.00 per hour. Indirect jobs are estimated to be in excess of 1,200,000.

No.5. J.P. Morgan

This letter dated April 27, 2016 is the first letter produced to demonstrate the ability to finance the new U.S. Grid without using any taxpayer dollars. Beau Biden suggested we submit the document in Florida to J. P. Morgan Private Banking due to complex banking problems that as the Attorney General in Delaware he was aware of. He suggested further that we wait at least 60 days from February 17, 2015, the issue date of the 24 page document to see if we receive a written rejection of same and the reason why. A few days prior to April 27, 2015 we had no notification of rejection from anyone in the State of Delaware; he was pleased for us to submit the document to J.P. Morgan as we did by FedEx. That letter, also, is available on the Home Page and there is a Menu Key available to select and view the J.P. Morgan letter and all the attachments including photos.

No. 6. United States Navy

The 4 page letter to the Secretary of the Navy, Ray Mabus, is dated June 8, 2015 and is available by Menu Key selection on the Home Page of our website [www.oilfreellc.com](http://www.oilfreellc.com)

The Navy was advised how they could view the Video of the demonstration of the Wallace HOD System producing hydrogen on demand at a minimum rate of 200 liters per minute. The size of the Hydrolyzer system demonstrated will be used primarily for the automotive industry with internal combustion engines of 500 horsepower or less. One gallon of clean fresh water or clean sea water would result in enough hydrogen fuel produced for a vehicle to travel 1,000 miles regardless of location.

Refueling of naval vessels that do not use nuclear energy but fossil fuel like a modern day destroyer must continuously refuel at sea when their supply reaches 50% depletion. That could be anytime, typically every 4-8 days and the process is dangerous and not simple. The destroyer must rendezvous with a larger ship that carries fuel whether it is an "oiler" or an "aircraft carrier" which must function as a floating fuel station. I personally served in the U.S. Navy aboard a Fletcher Class Destroyer June 1958 – June 1960 [The Purdy DD 734]. The exercise of refueling has not changed since that time and is usually considered "all hands on deck" and by no means a cakewalk for the personnel of either ship. GPS technology is now used to assist in speed and course but that was never a significant problem. The biggest downside of refueling at sea is time lost and providing a soft target while completing the process. When the NEW Wallace

February 26, 2016

HOD System is available for the U.S. Navy our taxpayer dollars will have a Navy with 30% to 40% more coverage and a significant reduction in fuel costs. If the Secretary of the Navy, the Secretary of Defense, the President and Vice President interviewed two (2) Navy Captains, one being from a Destroyer, the other from a refueling ship and the question asked "Would you like to see the refueling process eliminate?" Both would respond yes.

The New Wallace HOD System suitable in size to be used with the Caterpillar CAT G20CM34 10MW now in operation near Ulysses, Kansas could be the same size Hydrolyzer used in Navy vessels at sea. The advantage using the NEW Wallace HOD System on a naval vessel is clearly understood. Using the NEW Wallace HOD System as a fuel supplier for the CAT 20CM34 10MW and that combination to build the New U.S. grid will reduce the cost of electricity to both residential and commercial users by at least 50%.

The funding request in the amount of \$360 to \$432 million dollars by Oil Free LLC is detailed on the lower half of page 3 of the 4 page letter to the Secretary of the Navy dated June 8, 2015.

Unfortunately Beau Biden passed prior to being able to participate in the request to the U.S. Navy. He strongly believed it would enhance the United States of America two fold; first, it would make the Navy superior to any Navy in the World. And secondly, economically it would make American's number one again and with the direction of his father as the President the countries debt could be reduced and America would be prosperous again.

Mr. Vice President, I have filed a document dated June 8, 2015 with the Secretary of the Navy, Ray Mabus, which was delivered on June 10, 2015 and then received by Ashton Carter the Secretary of Defense. This letter was planned by your son and me once he was comfortable that the 24 page document was not in violation of any standard banking regulations; it is not. Our thoughts explained above in No. 6. are for the better good. He assured me that once Oil Free LLC filed with the Secretary of the Navy and the Secretary of Defense that you would intercede in order to assist the State of Delaware and the United States of America for the better good. It is apparently clear to the approximate 900 million who search daily for word of progress between Leonard D. Wallace and Ashton Carter. The progress report is simple there is none. I am frankly asking you to make a "yes" or "no" determination at this time whether Oil Free LLC will receive the grant of \$360 to \$432 Million dollars. I do not believe that it is fair between the two of us to wait more than an additional 30 days.

February 26, 2016

I have waited 261 days and on March 28, 2016 (Day 31) I expect to go forward with the U.S. Government or go to Capital Markets where there are many ready to help Oil Free LLC make "America Great Again".

Leonard D. Wallace  
Chairman
