## **OIL FREE LLC 2017 MESSAGE**

**PRINT DATE DECEMBER 7, 2016 15 PAGES**

President Elect Donald J. Trump  
and  
Vice President Elect Mike Pence

Gentlemen:

Security and liberty will be the two most important words in the four years you will guide and lead America to be great again. The book “Lights Out” by Ted Koppel is accurate as testified to by Jeh Johnson, Dr. Ernest Moniz and General Keith Alexander.

Please allow me and the entire Oil Free LLC team to help you make America Great Again. SECURITY and LIBERTY WILL FLOURISH FOR EVERYONE WITH OIL FREE LLC’S HELP AND KNOWLEDGE...issues like security and liberty if compromised could lead to Armageddon which would turn America into a playground with the bad guys victorious.

### **ARMAGEDDON AROUND THE CORNER**

Ted Koppel’s book “Lights Out”, released by Penguin Random House on October 27, 2015, explains in detail that a catastrophe to the U.S. grid is imminent, cannot be prevented at this time, and may not be repairable. This statement has been verified by the Director of Homeland Security, Jeh Johnson, Secretary of Energy, Dr. Ernest Moniz, and former chief of the National Security Agency, General Keith Alexander, who have all said that it is possible that a cyber-attack in the U. S. could cause Armageddon. On Wednesday August 17, 2016, while a guest on Greta Van Susteren’s show “On the Record” on Fox News Channel, Mayor Rudolph Giuliani said the war on terrorism includes proper intelligence gathering – and then keeping that information a secret. Further, he stated “This war against them and their war against us is beginning to become, and I predict four or five years from now is going to be a cyber war, we should start getting ready for that now. We are obviously not”. Analyzing what has been confirmed by Secretary Johnson, Dr. Moniz, and General Alexander, the easiest way to describe ARMAGEDDON in these 48 contiguous United States is this: NO Electricity, NO food, NO water, NO hospitals, and NO police and fire protection.

**AMERICA NEEDS A COMPLETE NEW ELECTRICAL GRID SYSTEM THAT CAN BE BUILT WITHOUT USING ANY TAXPAYER DOLLARS !!**

This letter completely describes Oil Free LLC's 2017 Message on how to rebuild a brand new electrical grid system in all 50 states using NO TAXPAYER DOLLARS, as explained in the [24-Page Delaware Document](#), which can be viewed on our website [www.oilfreellc.com](http://www.oilfreellc.com) This will also show that to build the grid requires a minimum of 6,840,000 new jobs for a twelve (12) year construction period. The entire construction workforce will automatically transition to maintenance and updating of various components that the new grid will be built from.

The renewable energy SOURCE is hydrogen (100% fossil fuel free) produced by hydrolysis of clean sea water. Our technology will reduce the cost of electricity by at least 50%. The explanation of the hydrolysis process is presented in the [Rights Agreement](#), and the [VIDEO](#) shows the manufacture of hydrogen. Both can be viewed on our website [www.oilfreellc.com](http://www.oilfreellc.com). Complete details can be found in this Oil Free LLC 2017 Message.

## **GOOGLE'S ACCREDITATION**

Credibility has been established and confirmed to Oil Free LLC by our presence on 25 various Google Pages; for 366 days from July 20, 2015 through July 20, 2016, a total in excess of 140 billion Search Results of files pertaining to Oil Free LLC ( [www.oilfreellc.com](http://www.oilfreellc.com) ) have been recorded.

## **HYDROGEN PRODUCTION**

Please review Oil Free LLC's VIDEO. The video can be viewed on our website [www.oilfreellc.com](http://www.oilfreellc.com) by selecting the VIDEO Menu key on our Home Page. The video demonstrates and describes the Wallace Hydrogen on Demand System [HOD] manufacturing hydrogen, a fume [GAZ] derived from fresh water or clean sea water to be used as fuel in any internal combustion engine or turbine. No fossil fuel is ever used, so greenhouse gases will be significantly reduced, and the long-term health of our country and its residents will greatly improve.

## **WHITE HOUSE INITIATIVE 2014-2015.**

PRESIDENT BARACK OBAMA'S REFUSAL TO STOP USING FOSSIL FUEL, FACEBOOK POSTED TO SECRETARY HILLARY CLINTON AND MR. DONALD J. TRUMP AUGUST 30, 2016 BY OIL FREE LLC Page-1

Mid-year 2014 the late Beau Biden asked Oil Free LLC's Chairman Leonard D. Wallace to develop a program which could be used as a basis for a political posture that would support his run for the Governorship of Delaware. Once achieved, it was confirmed that President Barack Obama approved this initiative and Vice President Joseph Biden was also going to use it to support his run for the Presidency of the United States. Unfortunately, Beau passed, and his father made it clear he would not be a candidate. Pages 1, 2, and 3 of the document titled Talking Points, dated February 17, 2015, which are indexed as pages 4, 5 and 6 of the 24-Page Delaware document, dated February 17, 2015, can be viewed on our website [www.oilfreellc.com](http://www.oilfreellc.com). The 24-page Delaware Document, as described above, was attached to a 5-page letter dated April 27, 2015 that was addressed to Managing Director, J. P. Morgan Private Banking, Palm Beach County, Florida; This letter was sent via Federal Express # 8075 7241 1935. The conclusion stated, after a careful review of these three pages and the statistics from the U.S. Energy Information Administration (EIA), the cost of electricity for the each of the 875,000 residents of Delaware at that time was \$5,000 per year. The elimination of petroleum in the production of electricity, and the use of the Wallace HOD System to generate hydrogen to fuel electricity production, would save the utility companies at least 90% of their fuel costs, and these savings would lead to a 50% reduction in rates to all customers. This calculated and forecasted savings, when adjusted to the population of the entire United States, would leave the end-users of electricity with between \$825 billion and \$1 trillion dollars in their pockets. This would be enough of an incentive to spur new economic activity, and provide a more stable financial situation for those living paycheck to paycheck.

## **WHITE HOUSE INITIATIVE 2014-2015**

PRESIDENT BARACK OBAMA'S REFUSAL TO STOP USING FOSSIL FUEL,  
FACEBOOK POSTED TO SECRETARY HILLARY CLINTON AND MR. DONALD J.  
TRUMP AUGUST 30, 2016 BY OIL FREE LLC Page-2

The cost to implement the Wallace HOD System would include the construction of a new grid complex, with all cables laid underground, thus virtually eliminating disruption due to natural disasters or from physical attack by terrorists. Advanced cyber protection would be integrated into the control systems. System design would eliminate the risk of any widespread failure. Armageddon, as described by Ted Koppel, could be prevented from becoming a reality.

Funding required for the new grid would be generated using NO TAXPAYER DOLLARS. Tax Free 6% State Revenue Bonds could be issued and sold [\*]. This would be the beginning of the New Industrial Revolution in the United States. The Obama White House stated firmly that they would not participate in the initiative, as conveyed by a Biden operative who wishes to remain anonymous. The reason given for this response: "it would not be politically correct at this time and would definitely cause our friends in the middle-east that sell oil to others to be quite upset". On June 8, 2015 a four page letter was sent to the Secretary of the Navy, Ray Mabus. This letter may be viewed on our website [www.oilfreellc.com](http://www.oilfreellc.com). The outline for this letter was developed before Beau Biden's death. It was pre-planned that his brother Hunter Biden had affiliations that would allow his father, Vice President Joseph Biden, to move along a Grant Request for Oil Free LLC to continue its development work. This never happened. Subsequently the White House's unwillingness to bring permanent renewable energy to the world has caused a minor delay in our exposure to U.S. Capital Markets. The Navy document explains how U.S. Navy ships would be able to use hydrogen as fuel instead of oil. This would enlarge its naval coverage by 25-50%. It would also completely eliminate all refueling at sea. The refueling process is dangerous and time consuming. I participated in this while serving 7 years in the U.S. Navy.

[\*] One time royalty fee will be paid to Oil Free LLC.

## **A NEW U.S. INDUSTRIAL REVOLUTION an AMERICAN EXCEPTIONALISM DEFINED**

### **THE VIDEO DESCRIBED IN HYDROGEN PRODUCTION BELOW ESTABLISHES PROOF OF CONCEPT**

#### **HYDROGEN PRODUCTION**

Please review Oil Free LLC's VIDEO. The video can be viewed on our website [www.oilfreellc.com](http://www.oilfreellc.com) by selecting the VIDEO Menu key on our Home Page. The video demonstrates and describes the Wallace Hydrogen on Demand System [HOD] manufacturing hydrogen, a fume [GAZ] derived from fresh water or clean sea water to be used as fuel in any internal combustion engine or turbine. No fossil fuel is ever used, so greenhouse gases will be significantly reduced, and the long-term health of our country and its residents will greatly improve.

#### **GOOGLE'S ACCREDITATION**

Credibility has been established and confirmed to Oil Free LLC by our presence on 25 various Google Pages; for 366 days from July 20, 2015 through July 20, 2016, a total in excess of 140 billion Search Results of files pertaining to Oil Free LLC ( [www.oilfreellc.com](http://www.oilfreellc.com) ) have been recorded.

**NO TAXPAYER DOLLARS NEED TO BE USED** to fund the cost of purchasing 200,000 10MW Gensets and installing same; 6% State Municipal Revenue Bonds can be issued by a state according to the document issued by Oil Free LLC on February 17, 2015 titled [24 Page Delaware Document](#) that is on our website [www.oilfreellc.com](http://www.oilfreellc.com) . Please see pages 1, 2 and 3 of the Talking Points section which are pages 4, 5 and 6 of the 24 Page Delaware document. Let it be known that Vice President Joseph Biden and President Barack Obama approved the plan as discussed above, due to the unfortunate death of Beau Biden, the plans architect, the plan came to cease late in May of 2015 upon his death.

#### **THE NEW U.S. GRID**

The forecasted estimate below has been modeled from the source information obtained from the State of Delaware Records. The information contained in the 24 Page document dated February 17, 2015 addressed to Josh Alcorn@Biden.com and authenticated by former Delaware Attorney General Beau Biden shows how replacing the U.S. Grid can be accomplished without using any Taxpayer dollars by issuing 6% tax free Municipal Revenue Bonds. Details are available on our website [www.oilfreellc.com](http://www.oilfreellc.com)

a) For every one million in population there needs to be 400 10 MW gen sets that will be fueled with hydrogen produced by Oil Free LLC's New Wallace HOD System [Hydrogen on Demand].

# **JOBS, JOBS, and more JOBS**

PRINT DATE DECEMBER 7, 2016 Page 2

## **A NEW U.S. INDUSTRIAL REVOLUTION an AMERICAN EXCEPTIONALISM DEFINED**

- b) Requirements needed to build a new electrical Grid with 100% underground waterproof wiring that will allow the gen sets to be installed in specially designed containment buildings.
- c) The existing 320,000,000 in U.S. population will easily increase to 400,000,000 at the conclusion of the construction of the new electrical grid.
- d) Requirement 400,000,000 population will require 200,000 10MW Gensets  
**LOWERING THE COST OF ELECTRICITY BT AT LEAST 50% WILL  
ENCOURGE MANUFACTURING JOBS TO RETURN.**
- e) **TOTAL NEW JOBS AS ESTIMATED AUGUST 30, 2016 IS 6,840,000**  
Year 1 420,000  
Year 2 420,000  
Years 3 through 12 600,000 new Jobs per year

Year 1 and Year 2 are dedicated for development only, years 3 through 12 will add 600,000 new jobs yearly for manufacturing and construction of the grid. These jobs will include power generation turbine genset manufacturing , transportation and delivery of all equipment to the various job sites and construction of the housing units for the operating turbine Gensets.

- f) Construction Cost (Estimated)
  - 10MW Gensets cost about \$6,500,000 FOB point of manufacture  
Requirement 200,000 x \$6,500,000 = Total \$1,300,000,000,000
  - Raw Materials for the design of the new housing structure has been estimated to be about \$1,000,000 per 10MW Genset.  
Requirement is 200,000 10MW Gensets x \$1,000,000 = Total \$200,000,000,000
  - Construction completion is \$4,000,000 per 10MW Genset  
Requirement 200,000 10MW Gensets x \$4,000,000 = Total \$800,000,000,000

## TALKING POINTS

1. Leonard D. Wallace Chairman and sole stockholder of Oil Free LLC states that the United States of America can become totally self-sufficient and produce sufficient electrical energy via power generation to replace the entire electrical grid over twelve (12) years, eliminate all fossil fuel and natural gas emissions at NO TAXPAYER COST....at all. It is public knowledge that the Executive Branch in Washington D.C. would like to eliminate the use of fossil fuels which release the poisonous carbon emissions to the atmosphere.

2. Exclusive of any reaction by the Executive Branch in Washington D.C. Oil Free LLC is willing to grant the United States of America and the State of Israel the use of the Wallace HOD technology free of charge for perpetuity, as long as there is no resale to any civilian and military entities. A great example of its use (The Wallace HOD Fuel Supply System) is the U.S. Navy Hydrogen Project at the Washington D.C. Navy Yard. They expect to have a hydrolyzer available so they can use sea water to fuel the Navy of the future. Expectations are that this could be realized in about ten (10) years....the Wallace HOD system is seven (7) to ten (10) years ahead of the U.S. Navy technology.

3. The Wallace HOD system used on large power generation units have the capacity to effectively replace the existing antiquated electrical grid in all 50 states of the United States of America over a twelve year period. A cost reduction of a minimum of 50% will be realized by the retail and commercial customers.

4. Attached is a 3 page letter to Caterpillar with a reference to a power generation plant in Ulysses, Kansas that is presently running and generating a minimum of 100 MW daily. Also attached are 5 other pages of Caterpillar Power Generation Stations in other parts of the World that are generating power. When a Wallace HOD system is added to a Caterpillar unit the Wallace HOD Hydrolyzer becomes the fuel supply extracting hydrogen form water via electrolysis. The fuel cost of natural gas is eliminated, and carbon emissions are reduced to zero. It should be noticed that the gaseous state of Natural Gas is almost identical to the gaseous state of Hydrogen produced by Electrolysis.

5. The Exhibit structure for the State of Delaware  
NO TAXPAYER DOLLARS NEEDED

5A. The current electricity cost for the State of Delaware in all sectors, residential, commercial and industrial is approximately \$4,380,000,000 yearly according to the U.S. Energy Administration.

5B. Using the Wallace HOD System with a Caterpillar Generation system the \$4,380,000,000 spent yearly for electricity in the State of Delaware would be reduced to \$2,190,000,000 yearly.

5C. The total income would be \$2,190,000,000 yearly for the entire State of Delaware.

5D. The Newco may decide to distribute its total income follows:  
Management and employment \$1,095,000,000 yearly  
Finance Reserve \$259,200,000 yearly.

5E. The estimated purchase cost excluding installation and fees to buy 360 Caterpillar G20CM34 10MW power generation gensets is figured at \$12,000,000 each. The total is \$4,320,000,000.

5F. The six (6%) percent annualized rate for tax free financing for the \$4,320,000,000 would be \$259,200,000 yearly. This would leave a surplus of \$835,000,000 yearly for the Newco.

6. With the use of these new technology Caterpillar Gensets fitted with the Wallace HOD Hydrolyzer System the cost savings will be 50% as compared to generating costs using diesel fuel, Natural Gas (NG) or coal. This cost savings should reflect directly to the consumer who will now have more cash to expand the local economy in Delaware.

7. Combined statistics from the State of Delaware and the United States show that the State of Delaware uses 3,000 Megawatts per day; this number encompasses all users of electricity. The required purchase for equipment to produce the required capacity is 360 Caterpillar G20CM34 10MW gensets. The gensets are coupled to reach the requirement for each location such as that for the Rubart Station facility near Ulysses, Kansas which couples 12 gensets and includes a 20% safety margin. This is the largest natural gas power generation system in the world.

8. HEALTH and WELFARE benefits to save lives. The mortality rate due to the rate of cancer deaths in the 12 mile radius area of the various Power Plants, especially the Pepco owned Delmarva Power Plant in Millsboro has been calculated to be \$980,000,000 to \$2,000,000,000 for years 2013 to 2020 in Delaware! For the Mid-Atlantic Region, for the same time period those numbers go from \$13 Billion to \$29 Billion! These statistics are from The Delmarva Power Integrated Resource Plan. The use of the Oil Free hydrolyzer offers a solution to those pollution related costs.

June 8, 2015

The Honorable Ray Mabus  
**Office of the Secretary of the Navy**  
1000 Navy Pentagon, Room 4D652  
Washington, DC 20350

**FEDERAL EXPRESS# 8075 7241 1800**

**RE: Oil Free LLC**

Dear Mr. Secretary:

My name is Leonard D. Wallace, Chairman and sole stockholder of Oil Free LLC, personally and corporately debt free, and like you, has served our country in the United States Navy. From June 1957 to June of 1964, I served as a Deck Seaman aboard a Fletcher Class destroyer, the USS Purdy DD-734 in Newport, Rhode Island for 24 months. We were at sea a third of the time but I must say, the most educational period of my entire life, which has brought me to where I am today. During my tenure, I enjoyed the modern conveniences of the Navy but was always obsessed with the antiquated refueling method naval vessels were subjected to while at sea. I was confident, eventually a solution would endure, so this is why I am writing you, to put forth this presentation letter requesting funds for the continuing development and design of our registered **Wallace HOD "Hydrogen on Demand" system**, which I own 100%, and would modernize the current antiquated refueling process, totally eliminating the use of fossil fuels.

Mr. Secretary, this tested and proven technology is a hydrolyzer, specifically designed to attach to an engine and produce hydrogen through the process of electrolysis, using fresh or clean ocean salt water. The hydrogen then becomes the fuel source to power an engine or turbine, eliminating the use of fossil fuels, and reducing carbon emissions to zero. Through further development and design of the Wallace HOD system, the entire U.S. naval fleet, excluding nuclear powered vessels, can operate on hydrogen as a power source, totally eliminating the dependence of petroleum or crude oil. Refueling of naval destroyers and other vessels while at sea will become obsolete. I am confident that once the U.S. Navy sees and learns of our technology, the procedure for calling "ALL HANDS ON DECK" for the refueling position will be abandoned.

It was reported in an article written by Lieutenant (Junior grade) Douglas L. Marsh, U.S. Navy, "Our Lethal Dependence on Oil", in June 2010, that the U.S. Navy consumes 33,000 gallons of fuel every 10 minutes and spends over \$8,600,000,000 billion dollars annually. We assume this expenditure has increased by at least by 1% per annum over the last 5-year period thus creating significant higher costs in fuel consumption. Although, the U.S. Navy Department is actively exploring alternative technologies for fuel and energy reductions, our research did not find any utilization of hydrogen as an

Oil Free LLC  
[www.oilfreellc.com](http://www.oilfreellc.com)

alternative fuel source in your current alternative energy program. Oil Free LLC believes hydrogen on demand is the solution to this never-ending expense and strongly feels the U.S. Navy should consider taking progressive action for the "better good" with further research and development engineering.

If given the proper funding, Oil Free LLC has independent engineering groups who will be able to custom design and manufacture a specific Wallace HOD Hydrolyzer for every type engine in your naval fleet. With the absence of fuel, future naval vessel designs can be streamlined, lighter in weight, provide additional cargo area for munitions and provisions and eliminate hazardous conditions during refueling procedures. Oil Free LLC believes this would be a maritime historical achievement for the Department of the Navy, creating hundreds of thousands of jobs while automatically maintaining the most environmentally friendly, strongest and efficient Navy in the world.

Mr. Secretary, the information contained herein, is genuine and ready for further research and development. A 3-page video transcript is attached for your review, which narrates the operation of our hydrolyzer. You can access the video on our website by visiting [www.oilfreellc.com](http://www.oilfreellc.com). When entering the site, click on Video (password-protected) and type in the password: bingobingobingo. Also attached, is a folder containing four (4) selected photo slides from a group of 19, which exhibit major components used in the development and production of the Wallace HOD hydrolyzer. They include:

**Photo slide 4:**

**Photo slide 14:**

Bottom Chamber - Electron Gun

*Description:* Thoriated Tungsten Gun - Electrode Installation

Oil Free LLC is embarking on a venture that will revolutionize the way we currently use energy in this country while simultaneously having an enormous, positive impact on our economy and global environment. I have attached a 24-page document, which discusses in part, our research and discussions for customizing the Wallace HOD Hydrolyzer for the entire US electrical grid system, beginning with the state of Delaware, and ongoing efforts, as described in, document index # 8, a 3-page letter to Dean Powell, General Manager of Caterpillar Energy Solutions in Houston Texas, concerning their project with Mid-Kansas Electric at the Rubart Station facility near Ulysses, Kansas with the use of Caterpillar, CAT G20CM34 natural gas-fired reciprocating generators.

As an exhibit for the state of Delaware, our research estimates the cost for electricity amounts to \$4,380,000,000.00 annually, as outlined in Item 5 A, page two, in the talking

point section of the document. Item 5B, exhibits the savings of fifty percent (50%) or \$2,190,000,000.00 using the Wallace HOD system for their 875,000 population. When we analyze the cost per one million in population, total electrical cost would exceed \$5,000,000,000.00 annually, at cost of \$5,000.00 per person. Now, if we use this result for the 330,000,000 population in the United States, electrical costs are estimated at One Trillion Six Hundred Fifty Billion dollars (\$1,650,000,000,000.00) resulting in a savings of Eight Hundred Twenty-Five Billion Dollars (\$825,000,000,000) annually, with the use of the Wallace HOD system technology.

The calculations are as follows:

- $1,000,000 \text{ Population} / 875,000 \text{ Delaware Population} = 1.1428 \text{ Raw Number}$
- $1.1428 \times \$4,380,000,000 = \$5,005,464,000$
- $\$5,000,000,000 / 1,000,000 \text{ population} = \$5,000 \text{ cost for electricity per person}$
- $\$5,000 \times 330,000,000 \text{ US population} = \$1,650,000,000,000 \text{ cost for US electricity}$
- $\$1,650,000,000,000 / 2 = \$825,000,000,000 \text{ savings}$

These are enormous savings for the entire country and with further research and engineering development, Oil Free LLC would create millions of jobs for the American worker and their families to rebuild an antiquated electrical grid and eliminate the dependency of fossil fuels in the United States and other nations while substantially reducing green house gas emissions worldwide. All, at NO TAXPAYER cost.

Our capabilities and achievements at Oil Free LLC are for the "better good" and may be classified as a "Disruptive Technology", as described in Daniel Yergin's book "The Quest". However, I am personally no stranger to this classification, as you'll see from the attached article written by a Niagara Falls journalist, a Peabody Award winner, Bill Gallagher. Further, Oil Free LLC's ongoing efforts in the future will certainly be credited nationally, and credited to your Naval legacy, as some may say, unmatched since John Paul Jones, while simultaneously supporting President Barak Obama's legacy and current position with eliminating greenhouse gas emissions.

Our team of engineers and professionals are ready to assist your department with designing and manufacturing a specific size Wallace HOD Hydrolyzer to meet with your specific naval requirements. In order for Oil Free LLC to move forward, the request for funds from the United States Navy are as follows:

- 90 million dollars for the replacement of funds spent from January 2008 until today.
- An annualized monthly amount for corporate maintenance and continuation of research for 7.5 million monthly, with 3 months advancement, readjusted and published in month 9.
- Estimated at 15 million a month, with 3 months in advance, readjusted and published in month 9, for research and development expenses and establishing a certifiable laboratory to customize hydrolyzer designs for various specialty engines that currently burn fossil fuels.

With further introduction from your office, Oil Free LLC is willing to give, gift, or grant all future development rights, of the Wallace HOD technology to the United States of America for their exclusive military use; there will be no royalty charges. This assumes a mutually drafted agreement between Oil Free LLC and the United States Government, which I will execute as Chairman and sole stockowner, which stipulates Oil Free LLC's ability to utilize this technology for all and any commercial uses.

In closing, I want to thank you for your consideration of this letter and am confident you will understand the enormous benefits before you in joining our vision with eliminating fossil fuel cancer, reducing destructive environmental greenhouse gas emissions, and putting the American worker and their families back to work.

Our Director of Manufacturing, A. Michael Ruggiero, a resident of Delaware, is available to personally meet with you and/or your staff members to address any questions or concerns you may have and to provide any additional information, as requested.

I look forward to hearing from you at your earliest convenience, once you have reviewed the enclosed.

Thank you.

Sincerely,

**Oil Free LLC**

Leonard D. Wallace  
Chairman and Sole Stockholder
