FACEBOOK POST [3] JANUARY 30, 2017

Donald J. Trump, President
Michael R. Pence, Vice President
Jared Kushner, White House Senior Advisor
Rudolph W. Giuliani Esquire, Cyber-security Advisor

Gentlemen:

The quote from President Trump on Friday January 20, 2017 following the inauguration ceremony has been heard loud and clear around the world, specifically here in the United States. The A-Team at Oil Free LLC is ready, willing and very capable of supporting the Trump White House in assisting in the eradication of all jihad terrorist movement around the world.

The four line quote below will become history when the Trump White House uses technology to convert the radical jihad terrorists to become peaceful family members ... this is a job for the Secretary of State not the Secretary of Defense. Page two of this document has a reproduction of a Bloomberg News article dated December 20, 2016. The article is the formula that will cause jihad terrorists to recognize an alternative life style because they will not be able to receive financial support for their cause from donors.

“WE WILL REINFORCE OLD ALLIANCES AND FORM NEW ONES – AND UNITE THE CIVILIZED WORLD AGAINST RADICAL ISLAMIC TERRORISM, WHICH WE WILL ERADICATE COMPLETELY FROM THE FACE OF THE EARTH”.

The OPEC oil ministers are waiting to see if President Trump and his White House will actually differ from the political assassination of the American citizens as practiced by President Obama, Vice President Biden, Secretary of State Kerry and Secretary of State Clinton.

President Obama’s past eight years retarded the U.S. military when he refused to utilize Oil Free LLC’s offer made in an August 2014 meeting at the White House...the U.S.A. suffered.

CALCULUS TO \$10 OIL

The calculus that supports the Bloomberg News article dated December 20, 2016 as reproduced, without any correction is printed below.

CHEAP HYDROGEN is produced with a connected device known as the Wallace HOD System that utilizes Oil Free LLC's invented system of hydrolysis.

“Hydrogen is the missing link in a 100 percent renewable-energy system, but technological bricks already exist.”

QUOTE -- BLOOMBERG NEWS

Big Utility Sees Pathway to \$10 Oil

By Francois De Beaupuy @FrancoisDeBeaupuy More stories by Francois De Beaupuy
December 20, 2016 6:35 AM

- Lower cost for solar, hydrogen and batteries to weigh on crude
- Innovation chief Lepercq sees ‘quasi-infinite and free energy’

The oil industry must brace for five energy “tsunamis” that threaten to drag prices as low as \$10 a barrel in less than a decade, according to [Engie SA](#)'s innovation chief

The falling cost of solar power and battery storage, rising sales of electric vehicles, increasingly “smart” buildings and cheap hydrogen will all weigh on crude, Thierry

Lepercq, head of research, technology and innovation at the French energy company, said in an interview. “Even if oil demand continues to climb until 2025, its price could drop to \$10 if markets anticipate a significant fall in demand,” Lepercq said at his office near Paris. Crude last slumped to that level in 1998.

“Solar, battery storage, electrical and hydrogen vehicles, and connected devices are in a ‘J’ curve,” he said. “Hydrogen is the missing link in a 100 percent renewable-energy system, but technological bricks already exist.”

The former French gas monopoly, which is now the world's largest non-state power producer following a decade of acquisitions, is investing in renewables while selling coal-fired plants and exploration assets to shield itself from commodity-price swings. It plans to spend 1.5 billion euros (\$1.57 billion) by 2018 on technologies including grid-scale battery storage, hydrogen output, “mini-grids” that serve small clusters of homes, and smart buildings that link up heating, lighting and IT systems to save energy and cut costs.

Lithium-ion battery cells.

BLOOMBERG NEWS DECEMBER 20, 2016. Bloomberg News has an extremely high degree of accuracy and cannot be labeled as a producer of “fake news”. The staff exceeds 19,000 when counted and operates in close to 200 offices. Bloomberg News has been defined around the world as a high caliber media organization. OIL FREE LLC has never had any contact with Bloomberg News.

CHEAP HYDROGEN Please view the video showing the operation of the Wallace HOD System producing hydrogen fume [GAZ]. This can be viewed by accessing our website www.oilfreellc.com and selecting the Menu Key titled VIDEO on our Home Page.

Once the video has been viewed you will have witnessed a hydrolyzer that functions as a “connected device” producing hydrogen as a fume [GAZ] to be used as fuel. The actual cost to produce enough hydrogen to power a four wheel vehicle of 500 horsepower or less to travel 1,000 miles is **\$1.00**; for a gallon of water. The gallon of water, which could be clean sea water, would be placed in the vehicles fuel tank (that has no fossil fuel in it) and pumped to the Wallace HOD System, a hydrolyzer, which is 9 inches cubed in size. The hydrogen fuel [GAZ] is then inserted directly into the combustion chamber of the engine by the Wallace HOD System.

OIL FREE LLC is a DISRUPTIVE TECHNOLOGY, a blessing in disguise...this state of the art knowhow will cause an industrial revolution in the United States of America and will certainly be a precursor to ensure that everyone in the U.S. will have the opportunity to redirect his or her previous employment skills to make their lives and the lives of their families extremely fulfilling and the American way of life will be copied around the world expeditiously.

NEW ELECTRICAL GRID US DOLLAR SAVINGS

- Residential ,commercial and industrial users of electricity will save about \$1 Trillion dollars annually based on statistics from EIA (U.S. Energy Information Administration)
- On a yearly basis the new electrical grid system powered by hydrogen produced by the Wallace HOD System, a hydrolyzer that will add about \$2 trillion dollars as an industry savings.

US NAVY FLEET

The Navy will be able to increase its sea coverage by 25-40% eliminating any refueling sea. Career Line Officers are very knowledgeable of details for both ships during refueling. Oil Free LLC's Wallace HOD System will eliminate refueling forever and clean sea water will be processed to produce hydrogen. We are now working with a qualified independent contractor aligned with the Norfolk Ship Yard.

Best Regards,

Leonard D. Wallace
Chairman
